| Risk Levels                                  | Little to No        | ne M                | linor               | Moderate            | Majo                | or                  | Extreme             |

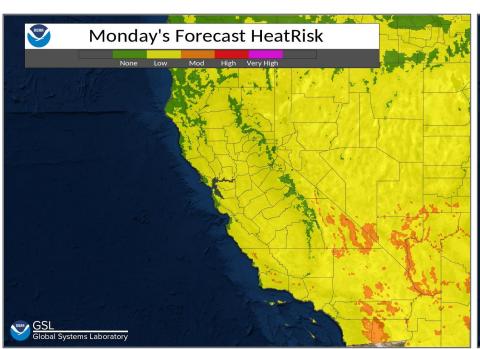

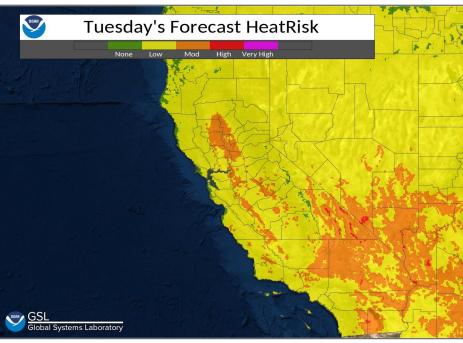

- Generally drier weather is expected through the week, though a few light showers are possible near the Oregon border Tuesday night, and potentially next weekend
- Temperatures will see a steady warming trend through this week and into the weekend
  - Readings will likely exceed 100 degrees across mainly inland areas, including the entire Central Valley, and may approach 105 degrees by Friday and the weekend
  - Moderate to high heat risk impacts will develop from midweek through the weekend for the Central Valley and interior portions of Southern Region, with the hottest temperatures likely occurring Friday and Saturday
- Winds will remain locally gusty many afternoons for mountain and foothill locations across the state, bringing periods of elevated fire weather conditions, particularly to the southern half of the state

# No significant precipitation is expected through Wednesday

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

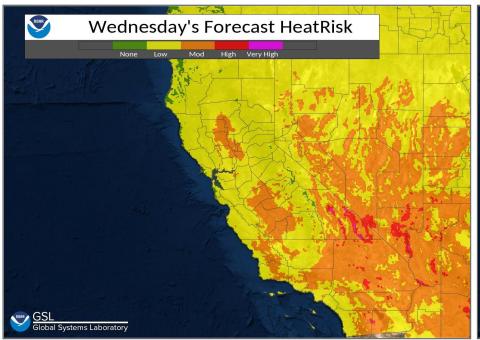

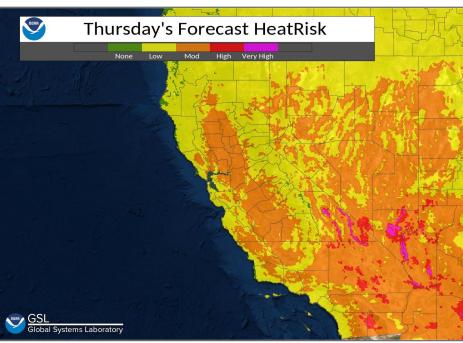

| Green  | Level 0 | No Elevated Risk  |
|--------|---------|---|
| Yellow | Level 1 | Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration    |
| Orange | Level 2 | Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration |

| Red     | Level 3 | High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration |
|---------|---------|---|
| Magenta | Level 4 | Very High Risk for the entire population due to long duration heat, with little to no relief overnight                                      |

Western Region Monday, June 6

## Weather Outlook (6-14 Days)

#### 6-10 Day Outlook (June 11 - June 15)

#### **Temperatures**

Above normal temperatures are strongly favored statewide

#### **Precipitation**

Near normal precipitation is favored for most of the state

#### 8-14 Day Outlook (June 13 – June 19)

#### **Temperatures**

Above normal temperatures are favored to continue across the southern two-thirds of the state, with below normal temperatures favored for far northern California

#### **Precipitation**

Near normal precipitation is favored for most of the state

### **Risk Assessment Matrix**

#### **Impact Level Definition**

- 1. Impactful weather is not expected.
- 2. Potential threat to lives and property if no/incorrect actions are taken.
  - a. Localized impacts on commerce possible.
  - b. Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.
  - a. Impacts on commerce possible.
  - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.
  - a. Significant impacts to commerce possible.
  - b. Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.
  - Significant and extended impacts to commerce.
  - b. Includes exceptionally rare events.
